About Me

I'm an Information Technology student interested in UI/UX Design, Artificial Intelligence, and creative technology. I enjoy learning new skills and exploring ways to create better digital experiences.

Projects

AniMood – Anime wallpaper website with browsing, favorites, uploads, and Supabase integration.

ServerWatch – Bash-based system monitoring project with a web dashboard.

Personal Portfolio - A digital portfolio presenting my background, skills, and selected projects as an Information Technology student.

Professional Summary

Fourth-year Information Technology student with an interest in UI/UX design, artificial intelligence, and creative technology. Eager to apply my technical and creative skills, gain practical experience, and continue growing in the IT field.

Professional Summary

- **AniMood** – Anime wallpaper website using HTML, CSS, JavaScript, and Supabase.
- **ServerWatch** – Bash-based system monitoring project with a web dashboard.
- **Personal Portfolio** – Portfolio website built and deployed using GitHub Pages.
